EDUCATION

Pillai HOC College of Engineering and Technology, Rasayani *2023 – 2027*
B.E. – Electronics and Computer Science Engineering | Mumbai University CGPA (Sem V): 7.59

Abhinav Dhyan Mandir Junior College, Karjat *2021 – 2023*
Higher Secondary Certificate (HSC)

Sharda Mandir, Karjat *2020 – 2021*
Secondary School Certificate (SSC)

PROJECTS

Cafe Management System | Python, Tkinter *Jan 2025*

- Built a desktop cafe management application featuring billing, menu management, and QR code payment integration using Python and Tkinter GUI framework.
- Automated order calculation and bill generation, reducing manual billing errors and improving checkout efficiency by streamlining the entire POS workflow.
- Implemented QR code-based payment module, enabling contactless transactions and accelerating payment processing for end customers.

Agricultural Monitoring System Using IoT | IoT, Sensors, Embedded C *Sep 2024*

- Designed and deployed an IoT-based real-time agriculture monitoring system that tracks temperature, humidity, and soil moisture using embedded sensor nodes.
- Enabled continuous remote monitoring of 3+ environmental parameters, allowing timely intervention and reducing crop risk due to adverse field conditions.
- Integrated sensor data pipeline from hardware nodes to a live dashboard, providing actionable insights to support data-driven irrigation decisions.

Automatic Plant Watering System | IoT, Sensors, Embedded Systems *Jun 2024*

- Engineered an automated irrigation system that activates a water pump based on real-time soil moisture sensor readings, eliminating the need for manual watering.
- Reduced water usage by ensuring irrigation triggers only when soil moisture falls below a defined threshold, contributing to sustainable resource management.

Laser-Based Security System | Microcontroller, Sensors, Embedded Systems *Mar 2024*

- Built an embedded security system using a laser emitter and photodetector circuit; programmed a microcontroller to trigger an alarm upon beam interruption.
- Achieved reliable intrusion detection with near-zero false positives through hardware calibration and interrupt-driven firmware logic.

Portfolio Website | HTML, CSS, JavaScript *Nov 2023*

- Developed a fully responsive personal portfolio website showcasing projects, technical skills, and contact information, optimized for desktop and mobile viewports.
- Deployed static site using GitHub Pages; applied CSS Flexbox and media queries to ensure consistent rendering across all screen sizes.

ACHIEVEMENTS

Academic Excellence: Maintained consistent academic performance at Mumbai University with a CGPA of 7.59 in Semester V, 6.92 in Semester III, and 6.83 in Semester IV across B.E. Electronics and Computer Science Engineering.

Project Leadership: Independently conceptualized and delivered 5 end-to-end engineering projects spanning IoT, embedded systems, Python development, and web technologies across 4 academic semesters.

Interdisciplinary Competency: Demonstrated cross-domain proficiency by building hardware-software integrated systems (IoT + embedded firmware) alongside full-stack web and desktop application projects.

TECHNICAL SKILLS

Languages: C, Python, JavaScript

Web & Deployment: HTML, CSS, GitHub Pages

Tools & Platforms: Git & GitHub, Tkinter, Embedded Systems, IoT Sensors & Microcontrollers, Cyber Security Basics
